Pump Test Reading Guide.docx PAA-1 Application 2.doc D1.pdf D2.pdf

Sam,

Enjoyed seeing you again yesterday and we all appreciated your repeated commitment to stay on schedule for completing your review on TCEQ's application for concurrence on the AE. To quickly resolve the issue regarding Ray's PP presentation that was missing a substantial amount of data from the pump test, primarily 7 of the 9 OMW monitor wells, I have attached several files that should put the issue to rest. I will send two additional files in a follow up email. The two additional files are too large for regular email but I can send them using Big Files Transfer. Please understand that with the exception of the attachment titled "Pump Test Reading Guide", the document that we are re-sending were previously provided to Region 6 over a month ago. I added the "Pump Test Reading Guide" to assist the reviewer(s) in understanding where to look for all of the supporting pump test data. It is our sincere hope that this information will clarify the matter

regarding the 9 overlying Sand A Monitor Wells. Lastly, we have located all of UEC's exploration borehole plugging verification reports from the Railroad Commission of Texas. I will put the reports on a CD and express mail it on Monday. Again, thanks for your continued effort on this matter. Have a good weekend.
